Education

Rajiv Gandhi University of Knowledge Technologies – RK Valley 2024 – 2028
B.Tech in Computer Science and Engineering CGPA: 8.75

Rajiv Gandhi University of Knowledge Technologies – RK Valley 2022 – 2024
Pre-University Course – MPC CGPA: 9.04

Work Experience

Bloomer Dec – Jan 2026
Web Developer Intern bloomer.in

Built and deployed a responsive **landing page** using **React.js** with an integrated **email subscription system** to capture pre-launch users.

Automated subscriber onboarding through a **welcome email workflow**, improving communication and supporting upcoming product launches.

Projects

Kids Hobbies Prediction System | *Machine Learning Web Application* [Live](#) — [GitHub](#)

- Developed a **Random Forest-based hobby recommendation system** for children aged **5–12 years**, trained on a dataset of **12,000+ records** and achieving **93% prediction accuracy**.
- Engineered a comprehensive questionnaire with **36+ behavioral, academic, sports, arts, health, and analytical-thinking parameters** to identify children's interests and predict suitable hobbies.
- Performed comparative evaluation of multiple ML models including **Random Forest, SVM, KNN, and Decision Tree**, selecting the best-performing model based on accuracy and generalization performance.
- Built and deployed a full-stack platform using **React, Django, scikit-learn, and JWT Authentication**, featuring prediction history, user feedback collection, and interactive analytics dashboards.

PaperVault – RGUKT Question Paper Repository | *Full Stack Web Application* [Live](#) — [GitHub](#)

- Built a centralized repository with **search, subject-wise filtering, bookmarks, download tracking, and JWT authentication** for RGUKT students.
- Implemented a **student upload & admin approval workflow**, enabling moderated contributions and maintaining content authenticity.
- Developed an **admin dashboard** to manage users, papers, approvals, and analytics using **Node.js, Express.js, MySQL, and Sequelize ORM**.

Medha AI – RGUKT Campus Assistant | *AI-Powered Web Application* [Live](#) — [GitHub](#)

- Built a **multilingual AI campus assistant** powered by the **Gemini API**, integrating **voice input, image analysis, and text-based conversations** to assist students with academic, administrative, and campus-related queries.
- Designed and implemented a **role-based complaint management system** with **RBAC**, enabling students and administrators to efficiently **submit, track, and resolve** campus issues through a complete end-to-end workflow.

Technical Skills

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js

Databases: MySQL, SQLite, Firebase Firestore

Tools: Git, GitHub, Vercel, Render, Google Cloud Console

Concepts: REST APIs, JWT Authentication, Machine Learning, Gemini API

Achievements

1st Place – Hack the Problem | *IT Club × Google Gemini × MLH* Dec 2025 | [GitHub](#)

- Won **1st Place** by building **Medha AI**, a multilingual **Gemini-powered campus assistant** featuring voice interaction, image analysis, and role-based authentication.

2nd Place – CodeEdge Hackathon Mar 2026 | [GitHub](#)

- Secured **2nd Place** among **55+ teams** by developing a **Computer Vision Semantic Segmentation** model for pixel-level classification of desert imagery across **10 environmental classes**.
